

SANKET BORKAR

Cloud & Network Engineer | AWS Certified Solutions Architect – Associate
sanketborkar72@gmail.com | +91 93091 82922 | linkedin.com/in/sanket-borkar

PROFESSIONAL SUMMARY

AWS Certified Solutions Architect – Associate with **3.5+ years** of hands-on experience in **network engineering** and **Linux server administration**. Handled Ubuntu and Amazon Linux servers in production, administered a Cisco Meraki SD-WAN corporate network, and served as the primary IT help desk contact delivering L2/L3 support to 150+ employees.

KEY SKILLS

Cloud (AWS)	EC2, S3, RDS, IAM, CloudWatch, VPC, Billing & Cost Optimization
Linux	Ubuntu & Amazon Linux (production), FTP & Samba Servers, User, Permission & Process Management, OS Patching
Networking	TCP/IP, DNS, DHCP, Subnetting, VLANs, Cisco Meraki SD-WAN, Firewall Rules, Cisco Secure Client VPN
Support	L2/L3 Technical Support, Windows 10/11, Microsoft 365, NAS & RAID, IT Help Desk, Documentation

PROFESSIONAL EXPERIENCE

IT Executive <i>Metamind Systems Pvt. Ltd.</i>	March 2023 – Present <i>Pune</i>
--	--

Cloud Infrastructure (AWS) & NOC Monitoring

- Worked hands-on with **EC2, S3, RDS, IAM, and CloudWatch**.
- Built a **VPC** with public and private subnets, IGW, NAT Gateway, and route tables.
- Managed **S3** versioning, lifecycle rules, and bucket policies.
- Set up **CloudWatch** alarms, dashboards, and log groups.
- Created **IAM** users, roles, and policies with least privilege.
- Tracked AWS billing and worked on **cost optimization**.

Linux Server & System Administration

- Handled **Ubuntu and Amazon Linux** servers in production.
- Installed and configured an **FTP server** on Linux; created FTP users and set folder-level access permissions.
- Configured a **Samba server** on Linux to share files with Windows users.
- Checked logs for errors and troubleshooting.
- Monitored CPU, memory, and disk using **top, free, df, and du**.
- Managed processes using **ps, kill, nice, and htop**.
- Created users and groups, and set file permissions using **chmod and chown**.
- Fixed network issues using **ping, traceroute, netstat, ss, and curl**.
- Performed **OS patching, kernel updates**, and basic security hardening.
- Implemented Network Attached Storage (**NAS**) solutions (Synology DS223j) with **RAID** configurations.

Network Infrastructure Management

- Designed and administered corporate network infrastructure using **Cisco Meraki SD-WAN** platforms, including MX75 firewalls, routers, and Layer 3 switches.
- Implemented **VLAN and network segmentation** for improved security, traffic management and control, and broadcast domain isolation.
- Configured **TCP/IP, DNS, DHCP**, and subnetting; maintained IP address allocation and documentation.
- Managed **firewall rules**, content filtering, and port forwarding.
- Configured and managed **Cisco Secure Client VPN** for secure remote access.
- Established and maintained security and surveillance networks using eSSL biometric and Hikvision CCTV systems.

Technical Support & Documentation

- Delivered comprehensive **Level 2/3 technical support** for a user base of **150+ employees**, resolving complex software, hardware, and network issues with a strong focus on customer service and clear communication with non-technical users.
- Provided expert **Windows 10/11 and Microsoft 365** PC/laptop troubleshooting, including OS imaging, application support, and hardware diagnostics to minimize end-user downtime.
- Served as the **primary IT help desk contact**, handling calls professionally and documenting issues with clear resolution timelines.

CERTIFICATIONS & TRAINING

AWS Certified Solutions Architect – Associate	Validation No: 766RPG62ZBEEQMSL
AWS Certified Cloud Practitioner	Validation No: XX8VWW4CSFE4QLC8
Cisco Certified Network Associate (CCNA) – Course completed (Udemy)	2025
Cisco Certified Network Professional (CCNP)	In progress
