

# SANKET BORKAR

Network Engineer | CCNA Trained | AWS Certified Solutions Architect – Associate  
sanketborkar72@gmail.com | +91 93091 82922 | linkedin.com/in/sanket-borkar

## PROFESSIONAL SUMMARY

Network engineer with **3.5+ years** of hands-on experience designing, administering and troubleshooting enterprise **LAN, WAN and network security** infrastructure. Designed and administered a corporate network on **Cisco Meraki SD-WAN** with MX75 firewalls, routers and Layer 3 switches, implementing **VLAN segmentation**, firewall policies and remote-access VPN. Also administers Ubuntu and Amazon Linux servers and AWS cloud networking, and is the primary IT help desk contact for 150+ employees.

## KEY SKILLS

|                                |                                                                                                              |
|--------------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>Routing &amp; Switching</b> | Cisco Meraki SD-WAN, Routers, Layer 3 Switches, VLANs & Network Segmentation, IP Addressing & Subnetting     |
| <b>Network Services</b>        | TCP/IP, DNS, DHCP, IP Address Allocation & Documentation                                                     |
| <b>Network Security</b>        | MX75 Firewalls, Firewall Rules, Content Filtering, Port Forwarding, Cisco Secure Client VPN                  |
| <b>Monitoring</b>              | AWS CloudWatch Alarms & Dashboards, Log Analysis, ping, traceroute, netstat, ss, curl                        |
| <b>Systems</b>                 | Ubuntu & Amazon Linux (production), Windows 10/11, Microsoft 365, NAS & RAID, eSSL Biometric, Hikvision CCTV |
| <b>Cloud (AWS)</b>             | VPC (Public/Private Subnets, IGW, NAT Gateway, Route Tables), EC2, S3, RDS, IAM, CloudWatch                  |
| <b>Support</b>                 | L2/L3 Technical Support, IT Help Desk, Incident Documentation                                                |

## PROFESSIONAL EXPERIENCE

### IT Executive

March 2023 – Present

Metamind Systems Pvt. Ltd.

Pune

#### Network Infrastructure Management

- Designed and administered corporate network infrastructure using **Cisco Meraki SD-WAN** platforms, including **MX75 firewalls**, routers, and **Layer 3 switches**.
- Implemented **VLAN and network segmentation** strategies for improved network security, traffic management and control, and broadcast domain isolation.
- Configured **TCP/IP, DNS, DHCP**, and subnetting; maintained **IP address allocation** and network documentation.
- Managed **firewall rules**, content filtering, and port forwarding.
- Configured and managed **Cisco Secure Client VPN** for secure remote access.
- Established and maintained security and surveillance networks using **eSSL biometric** and **Hikvision CCTV** systems.
- Fixed network issues using ping, traceroute, netstat, ss, and curl.

#### Server & System Administration

- Handled **Ubuntu and Amazon Linux** servers in production.
- Installed and configured an **FTP server** on Linux; created FTP users and set folder-level access permissions.
- Configured a **Samba server** on Linux to share files with Windows users.
- Checked logs for errors and troubleshooting.
- Monitored CPU, memory, and disk using **top, free, df, and du**; managed processes using **ps, kill, nice, and htop**.
- Created users and groups, and set file permissions using **chmod and chown**.
- Performed **OS patching, kernel updates**, and basic security hardening.
- Implemented Network Attached Storage (**NAS**) solutions (Synology DS223j) with **RAID** configurations.

#### Cloud Networking (AWS) & NOC Monitoring

- Built a **VPC** with public and private subnets, Internet Gateway (IGW), NAT Gateway, and route tables.
- Set up **CloudWatch** alarms, dashboards, and log groups for infrastructure monitoring.
- Worked hands-on with **EC2, S3, RDS, and IAM**; created IAM users, roles, and policies with least privilege.
- Managed **S3** versioning, lifecycle rules, and bucket policies.
- Tracked AWS billing and worked on **cost optimization**.

#### Technical Support & Documentation

- Delivered comprehensive **Level 2/3 technical support** for a user base of **150+ employees**, resolving complex software, hardware, and network issues with a strong focus on customer service and clear communication with non-technical users.
- Provided expert **Windows 10/11 and Microsoft 365** PC/laptop troubleshooting, including OS imaging, application support, and hardware diagnostics to minimize end-user downtime.
- Served as the **primary IT help desk contact**, handling calls professionally and documenting issues with clear resolution timelines.

## CERTIFICATIONS & TRAINING

Cisco Certified Network Associate (CCNA) – Course completed (Udemy)

2025

Cisco Certified Network Professional (CCNP)

In progress

AWS Certified Solutions Architect – Associate

Validation No: 766RPG62ZBEEQMSL

AWS Certified Cloud Practitioner

Validation No: XX8VWW4CSFE4QLC8
